The image displays two overlapping windows from a Windows 11 desktop. The top window is the Windows Security application, showing the 'Virus & threat protection' settings. It indicates 'No current threats' and 'Security intelligence is up to date'. A red box highlights the 'Virus & threat protection updates' section, which shows the last update was on 23-09-2026 at 21:09. The bottom window is Wireshark, showing a network capture on the 'eth0' interface. The packet list on the left shows a series of TCP segments from 172.64.155.209 to 10.88.156.105. The packet details pane shows the structure of a TCP segment, including the 'Transport Layer Security' protocol. The packet bytes pane shows the raw data in hexadecimal and ASCII. The status bar at the bottom of Wireshark indicates 'Packets: 1216 - Displayed: 198 (16.3%) - Dropped: 0 (0.0%)'.

The top screenshot shows a Wireshark capture of network traffic. The packet list on the left shows a GET request to /connecttest.txt. The packet details pane on the right shows the structure of the packet, including the Ethernet II, Internet Protocol Version 4, Transmission Control Protocol, and Hypertext Transfer Protocol layers. The packet bytes pane at the bottom shows the raw data in hexadecimal and ASCII.

The bottom screenshot shows a detailed view of the same packet. The packet list on the left shows the packet details. The packet details pane on the right shows the structure of the packet, including the Ethernet II, Internet Protocol Version 4, Transmission Control Protocol, and Hypertext Transfer Protocol layers. The packet bytes pane at the bottom shows the raw data in hexadecimal and ASCII.
